

REGULATOR

BUILT FOR FLORIDA

BORN IN NORTH CAROLINA RAISED IN THE NORTHEAST BUILT FOR FLORIDA

A NOTE FROM OUR FOUNDER

Regulator has been playing in Florida waters since day one. It's where we sold our very first boat in the early 90s. It's the home of some of our favorite fishing destinations. And it's the perfect place to enjoy everything our center console boats have to offer.

If you haven't had the chance to ride a Regulator, reach out to your local dealer and get out there! If you want to talk with a Florida owner, say the word and we will connect you.

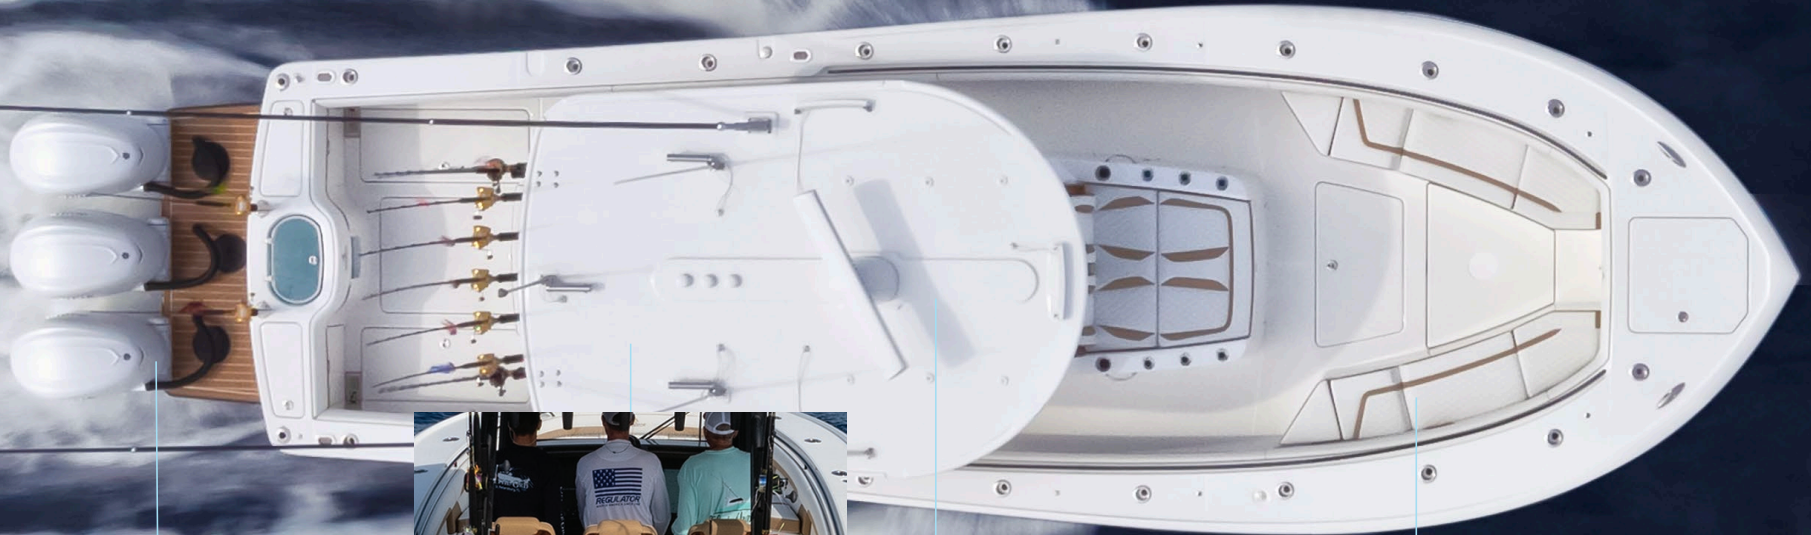

Thank you for considering Regulator, and let us know how we can help.

— Joan Maxwell
President & Co-Founder

NEW FOR 2026

The best just got better, with new features throughout the fleet. Standard Seakeeper Ride, magnetic cushions, black powder coat rails, port & starboard LED light bars and amplified fishbox refrigeration...plus the unbeatable ride Regulator has been known for since 1988.

**New models are now in stock at your local dealer.
Tour and trial the latest today.**

SEAKEEPER RIDE IS NOW STANDARD!

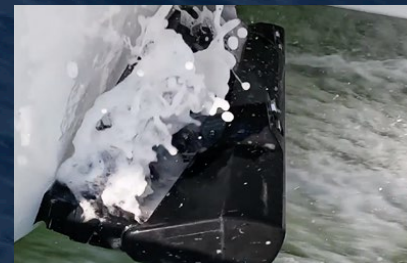

Regulator's unbeatable ride and Seakeeper Ride's cutting-edge stabilization go hand in hand.

Designed for high-speed performance and real-time motion correction, Seakeeper Ride is a transom-mounted Vessel Attitude Control System™ (VACS) that offers complete underway stabilization, correcting motion before you even feel it — and eliminating pitch, roll, and yaw. Plus, it's fully automatic: no controls to adjust, no input required. **Just turn it on and enjoy the ride.**

WHY DO WE OFFER IT STANDARD?

Because we want to ensure factory-installed excellence and a turnkey experience that gets you out on the water the moment you make it yours.

READY TO RUN...

FROM DAY ONE

In our factory — nothing is an afterthought. Our expert engineers consider every aspect of your Regulator ride from day one.

Yamaha engines are factory-installed and dialed in for ultimate performance. Seakeeper Ride comes standard, and Garmin electronics are rigged by in-house technicians, fully integrated with Yamaha and Seakeeper systems from the start.

We also work with Yamaha to be sure that props are power-matched to your boat and engines, then ship with props dialed in and batteries on board. This means your Regulator is ready to run within hours of reaching your dock. And nothing stands in the way of the ride of your life.

Every one of our offshore center console boats features 24 degrees of deadrise. That's why only a Regulator crushes offshore chop and delivers smoother, drier, more controlled rides in every condition — with a custom-engineered stringer system that makes the entire boat feel unshakable.

Ride it once, feel the difference forever.

Regulator's XO Series of hybrid center console boats is designed to go anywhere and do everything — giving you easy access to lakes, bays and skinny waters, plus the capability to head offshore when the time is right.

“I’ve spent my life on the water and I’ve never found another boat that holds up like a Regulator.”

When it comes to boating, there’s a reason why so many Regulator owners become owners for life. Just ask Wade McCann. What started with his dad and brother on a Regulator 26 has come full circle with Wade now owning a Regulator 25. “No matter how rough the seas, I know the fittings won’t come loose — something I can’t always say about other boats I’ve captained.”

After moving his young family to Jupiter, Florida, Wade made it his mission to find his Regulator. While he tried out an Everglades 230, which he described as a solid boat, he quickly realized it was just too small and didn’t perform well in sporty conditions. That’s when he purchased his Regulator 25.

“We were exiting Jupiter Inlet with an outgoing tide pushing against northeast winds, creating those ‘standing waves’ that are tough on many boats...but not my Regulator. My boys and I charged right through it without getting a drop of water on us. It’s a beast of a boat.”
